

What research and development does Vimia do?

Vimia conducts research and development as a continuing learning process to stay up to date and to be able to offer its customers services based on the state-of-the-art.

The goal of this research is thus vitality, timeliness, technical edge and further consolidation of experience. If creativity results from this process, it may not be purely coincidental.

Last, but not least, the experience gained from R&D help to further the vitality and timeliness of Vimia's consultancy services.
